

CONFLICT MINERALS SOURCING POLICY

City Plating and Metal Finishing takes seriously the worldwide concerns for conflict minerals and is committed to a policy of conflict-free sourcing of these materials.

City Plating and Metal Finishing requires its supply chain partners to certify that they do not knowingly provide conflict minerals for use in any of City Plating and Metal Finishing's products or services. Further, City Plating and Metal Finishing performs regular risk assessments of its supply chain and provides disclosure through the Responsible Minerals Initiative (RMI).

City Plating and Metal Finishing affirms that none of the metals contained in our products are derived or sourced from mines in the conflict areas of the Democratic Republic of the Congo (DRC) and therefore are conflict-free.
